

# BEYOND REALTIME

prewave predicts labor strikes up to 7 days in advance

Prewave analyzes social media data with advanced machine learning techniques to predict upcoming labor strikes in supply chain networks

Dynamic map of labor strike alerts

Access Prewave data and improve your strike awareness:

### Integrate Prewave strike alerts

with your existing software systems using Prewave plugins or the Prewave API

### Visualize Prewave strike alerts

on the Prewave map in your web browser without any installation

## Your Benefits

- ✓ Increased awareness on upcoming strike risks in your supply chain environment
- ✓ Early alerts increase your time to react on potential disruptions and coordinate mitigation activities
- ✓ Reduced negative impact of disruptions

## Wanted: Pilot customers

We are currently looking for pilot customers. Please contact us for more information!

Contact us for more information or a free demo presentation!
